

Occupational Therapist Database Manual, Version 3.0

March 2013

Spending and Health Workforce

Our Vision

Better data. Better decisions. Healthier Canadians.

Our Mandate

To lead the development and maintenance of comprehensive and integrated health information that enables sound policy and effective health system management that improve health and health care.

Our Values

Respect, Integrity, Collaboration, Excellence, Innovation

Foreword

This document outlines the data submission specifications and the data dictionary for the Occupational Therapist Database (OTDB) at the Canadian Institute for Health Information (CIHI), including the technical specifications, file and record layout for data submission to CIHI, all data elements, value labels and definitions, and a brief rationale for the collection of each data element.

This is one of two documents that data providers should assess carefully prior to undertaking any work in terms of system development. The other is the jurisdiction-specific *Form Mapping Document*.

Form Mapping Document

This document is developed for each data provider. It assesses the information collected on the data provider's registration and renewal forms and maps (matches/aligns) it to the data elements and values in this manual. The *Form Mapping Document* also identifies which membership/registration categories for each jurisdiction should be submitted to CIHI as part of the data submission.

Occupational Therapist Database Manual

In this publication, the OTDB team has combined the functions of two reference documents: the *Occupational Therapist Database Data Submission Specifications Manual* and *Occupational Therapist Database Data Dictionary*. This was done to create one point of reference for data providers and interested parties for all questions regarding the creation of the OTDB.

Preface

The Canadian Institute for Health Information (CIHI) is an independent, pan-Canadian, not-forprofit organization working to improve the health of Canadians and the health care system by providing quality health information.

CIHI's mandate, as established by Canada's health ministers, is to coordinate the development and maintenance of a common approach to health information for Canada. To this end, CIHI is responsible for providing accurate and timely information that is needed to establish sound health policies, manage the Canadian health system effectively and create public awareness of factors affecting good health.

To meet this mandate, CIHI's core functions include the coordination and promotion of national health information standards and health indicators, the development and management of health databases and registries, the funding and facilitation of population health research and analysis, the coordination and development of education sessions and conferences, and the production and dissemination of health information research and analysis.

The Occupational Therapist Database (OTDB) is one of 27 health databases maintained by CIHI. Any questions regarding the OTDB should be directed to

Program Lead, Occupational Therapist Database Canadian Institute for Health Information 495 Richmond Road, Suite 600 Ottawa, Ontario K2A 4H6

Tel.: 613-241-7860 Email: otdb@cihi.ca

Acknowledgements

CIHI wishes to acknowledge and thank the staff from organizations that generously contributed their time and input to the consultation process leading to the development of the first national minimum data set for occupational therapists in Canada. The following provincial/territorial and national organizations participated:

- Alberta College of Occupational Therapists
- Canadian Association of Occupational Therapists
- College of Occupational Therapists of British Columbia
- College of Occupational Therapists of Manitoba
- College of Occupational Therapists of Nova Scotia
- College of Occupational Therapists of Ontario
- New Brunswick Association of Occupational Therapists
- Newfoundland and Labrador Occupational Therapy Board
- Ordre des ergothérapeutes du Québec
- Prince Edward Island Occupational Therapists Registration Board
- Saskatchewan Society of Occupational Therapists

1 Introduction

Effective management of health human resources requires access to accurate, comparable, and timely data. Currently there is very little standardized national data on health professionals except physicians and regulated nursing professionals. To continue fulfilling its mandate and increase the availability of standardized value-added information for health human resources, CIHI developed five new national supply-based databases for the following professional groups: pharmacists, occupational therapists, physiotherapists, medical laboratory technologists and medical radiation technologists.

The OTDB is one of the five databases developed and provides a source of timely, quality information for occupational therapists in Canada. The OTDB aims to provide standardized comparative data and reports on the demographic, education, geographic and employment information of occupational therapists in Canada. The data will be used for statistical reporting and research purposes, including, but not limited to, pan-Canadian reports, analytical tools, an annual statistical report, ad hoc data/information requests, and analytical studies pertaining to the supply and distribution of the occupational therapist workforce in Canada.

This document is the result of work completed through a consultation process between CIHI and potential data providers in order to meet the priority information needs of occupational therapists. The data elements, values and associated definitions were developed and reviewed by the representatives from the provincial/territorial regulatory authorities for occupational therapists, the Canadian Association of Occupational Therapists, and the Occupational Therapist Database development team at CIHI.

1.1 About the Database

CIHI's OTDB collects national, standardized, supply-based data on occupational therapists in Canada.

The OTDB aims to provide standardized comparative data and reports on the demographic, geographic, education and employment information of occupational therapists in Canada. The data allows for clear and objective analyses that will support informed decision-making and policy formulation. The data is also used for statistical reporting and research purposes, including, but not limited to, pan-Canadian reports, analytical tools, an annual statistical report, ad hoc data/information requests and analytical studies pertaining to the supply and distribution of the occupational therapist workforce in Canada.

CIHI is a secondary source of data; the data for the OTDB is supplied by the 10 provincial occupational therapist regulatory bodies (provincial licensing data for their respective province) and the Canadian Association of Occupational Therapists (voluntary membership data for the territories).

The data providers are responsible for data collection, which occurs during the annual registration process. The data providers must complete any manipulation of the jurisdictional data that is necessary to meet the national standards before submitting the data files to CIHI. They must submit data in the form of a sequential text file, per the specifications outlined in this document.

1.2 Purpose of This Document

The purposes of this document are to

- Provide the rationale for collecting specific data elements;
- Define the data elements and sub-elements collected by the OTDB;
- Provide technical specifications for data submission to the OTDB; and
- Provide technical specifications for CIHI's Information and Technology Services team for the maintenance of the OTDB.

Data providers submitting data to CIHI for the OTDB must ensure that the data aligns with the specifications outlined in this document.

2 List of Data Elements and Rationales

The purpose of the OTDB is to provide demographic, geographic, education and employment information at the provincial/territorial and national levels to support health human resources planning and health care delivery. To this end, the data elements that make up the national minimum data set for occupational therapy are identified below, along with the rationale for their inclusion in the OTDB.

Field/Data Element	Rationale				
The number and demographic characte the available health workforce provide in	Identifiers and Demographic Information The number and demographic characteristics of health personnel who are registered, licensed or otherwise part of the available health workforce provide important information. For example, they permit an examination of how age and sex can influence workforce participation.				
1. Provincial/Territorial Unique Identification/Registration Number	Needed to uniquely identify a professional within a particular jurisdiction ar to follow changes specific to that individual over time (within the jurisdiction submitting data).				
2. Gender	Needed to calculate sex-related workforce indicators (for example, proportion of the workforce that is female).				
3. Year of Birth	Needed to calculate age-related workforce indicators (for example, the average age of the workforce).				

Field/Data Element	Rationale			
Geography Geography is important in a country the size of Canada, and understanding the distribution of health personnel (for example, in terms of rural or urban practice/employment setting) and how this distribution relates to geography is important to workforce planning and policy development. Please note that the full six-digit postal code of employment is collected in the domain Employment—Current (Specific).				
4. Province/Territory of Residence (Canadian)	Needed to analyze the geographical distribution of the workforce. In addition, information on a registrant's Canadian province/ territory or			
5. Country of Residence	country of residence is used (in combination with other elements) to reduce the level of double counting of registrants registered in more than one Canadian jurisdiction.			
6. Province of Registration (Canadian)				
7. 8. 9. Concurrent Province of Registration (1, 2, 3)	Provides an indication of the proportion of registrants who are registered in other Canadian jurisdictions.			
10. 11. 12. Concurrent Country of Registration (1, 2, 3)	Provides an indication of the proportion of registrants who are registered in other jurisdictions.			
13. Previous Province of Registration (Canadian)	Provides an indication of where registrants were registered in other jurisdictions.			

Field/Data Element	Rationale			
Education Monitoring basic information on the education attained by the workforce can allow for the examination of the sequencing and timing of different educational attainments (for example, initial education in the profession of interest, highest education in the profession of interest and highest education outside of the profession of interest) of the workforce. Year of graduation for basic education in the profession is also used to generate an indicator of the maximum length of time in the workforce (that is, years since graduation from basic education in the profession). Looking at province of graduation allows for the examination of a jurisdiction's capacity to retain occupational therapists trained in the jurisdiction and can also be used to target recruitment efforts (for example, to specific Canadian schools, provinces/territories or countries).				
15. Level of Basic Education in Occupational TherapyUsed to monitor changes in the basic educational attainment of the workforce.				
16. Year of Graduation for Basic Education in Occupational Therapy	Used to examine the sequencing and timing of different educational attainments (initial education in the profession of interest, other education in the profession of interest and other education outside of the profession of interest) of the workforce. Year of graduation for basic education in the profession is also used to generate an indicator of the maximum length of time in the workforce (that is, years since graduation from basic education in the profession).			
17. Canadian University of Graduation for Basic Education in Occupational Therapy	Used to identify where basic education in occupational therapy was completed. It allows monitoring of the Canadian-trained/foreign-trained composition of the workforce, and analysis of provincial capacity to retain graduates.			
18. Country of Graduation for Basic Education in Occupational Therapy				
19. 23. 27. Level of Post-Basic Education in Occupational Therapy (1, 2, 3)	Used to monitor changes in the educational attainment of the workforce.			
20. 24. 28. Year of Graduation for Post-Basic Education in Occupational Therapy (1, 2, 3)	Used to monitor trends in the sequencing and timing of occupational therapy educational attainments.			

Field/Data Element	Rationale			
Education (cont'd) Monitoring basic information on the education attained by the workforce can allow for the examination of the sequencing and timing of different educational attainments (for example, initial education in the profession of interest, highest education in the profession of interest and highest education outside of the profession of interest) of the workforce. Year of graduation for basic education in the profession is also used to generate an indicator of the maximum length of time in the workforce (that is, years since graduation from basic education in the profession). Looking at province of graduation allows for the examination of a jurisdiction's capacity to retain occupational therapists trained in the jurisdiction and can also be used to target recruitment efforts (for example, to specific Canadian schools, provinces/territories or countries).				
21. 25. 29. Canadian University of Graduation for Post-Basic Education in Occupational Therapy (1, 2, 3)	Used to identify the location of where post-basic education in occupational therapy was completed. It allows monitoring of the Canadian-trained/ foreign-trained composition of the workforce and analysis of provincial capacity to retain graduates (for provinces with education programs).			
22. 26. 30. Country of Graduation for Post-Basic Education in Occupational Therapy (1, 2, 3)				
31. 36. Level of Education in Other Than Occupational Therapy (1, 2)	Used to identify and monitor the level of education attained outside the field of occupational therapy and to augment an occupational therapist's education profile.			
32. 37. Field of Study of Education in Other Than Occupational Therapy (1, 2)	Used to analyze the type of post-secondary training that a professional has obtained outside of the primary health discipline.			
33. 38. Year of Graduation for Education in Other Than Occupational Therapy (1, 2)	Used to monitor trends in the sequencing and timing of educational attainment outside the field of occupational therapy.			
34. 39. Province of Graduation for Education in Other Than Occupational Therapy (Canadian) (1, 2)	Used to identify where education outside occupational therapy was completed. It allows monitoring of the Canadian-trained/foreign-trained composition of the workforce and analysis of provincial capacity to retain graduates.			
35. 40. Country of Graduation for Education in Other Than Occupational Therapy (1, 2)				

Field/Data Element	Rationale				
Employment—Current (General) An understanding of employment and practice characteristics as well as the nature of labour force participation of health personnel (for example, whether personnel are working full time or part time) can help inform policy decisions at the national/provincial/territorial level (e.g. more educational seats to produce more health personnel could be funded) to the site of employment (e.g. more full-time positions could be made available).					
41. Employment Status	Used to differentiate between registrants who are employed in occupationa therapy or unemployed, and if unemployed, whether seeking employment in occupational therapy or not. Capturing this data element also allows for the identification of a portion of the potentially available, but not employed, registered workforce.				

Field/Data Element	Rationale			
Employment—Current (Specific) Primary Employment—the employment, with an employer or in a self-employed arrangement, that is associated with the highest number of usual weekly hours worked. Secondary Employment—the employment, with an employer or in a self-employed arrangement, associated with the second-highest number of usual weekly hours worked. Third Employment—the employment, with an employer or in a self-employed arrangement, associated with the third-highest number of usual weekly hours worked.				
42. 54. 66. <i>Employment Category</i> (Primary, Secondary and Third)	Used to differentiate between those in an employee–employer work relationship and those who are self-employed. For registrants in an employee–employer work relationship, the distinction between permanent, temporary and casual employment (in combination with other data elements such as those concerning employment status and hours worked) provides an indication of changes in the conditions of employment for a profession (for example, a change to more temporary rather than permanent work arrangements with employers).			
43. 55. 67. <i>Full-Time/Part-Time Status</i> (Primary, Secondary and Third)	Used to identify some basic conditions of employment, for both those in an employee–employer relationship and those who are self-employed. When assessed in combination with other data elements, an estimation of the potential capacity of the available workforce can be determined (for example, professionals working part time who could potentially move to full-time employment).			
 44. 56. 68. Province/Territory of Employment (Canadian) (Primary, Secondary and Third) 45. 57. 69. Country of Employment (Primary, Secondary and Third) 	Needed to analyze the geographical distribution of the workforce. In addition, information on a registrant's Canadian province/ territory of employment is used (in combination with other elements) to reduce the level of double counting of registrants registered in more than one Canadian jurisdiction.			
46. 58. 70. <i>Postal Code of Employment</i> (Primary, Secondary and Third)	Collected to examine the geographical distribution of the workforce at all of the desired units of analysis (national, provincial/territorial and sub-provincial/territorial area) and to investigate geographic concepts relevant to health planning (such as the urban–rural distribution of the health workforce).			
47. 59. 71. Site of Practice Indicator for Postal Code of Employment (Primary, Secondary and Third)	Designed to qualify analysis based on the Postal Code of Employment, by identifying whether or not the postal code reflects a practice-level worksite. This can be an important qualifier for Postal Code information for professions that typically work at multiple sites within the community, potentially some distance from an employer's location.			
48. 60. 72. <i>Position</i> (Primary, Secondary and Third)	This element provides an indication of the role that the professional plays within an employment setting and allows for a more precise differentiation of those professionals primarily involved in direct service provision, compared with those professionals involved in other roles, for example, as educators.			
49. 61. 73. <i>Employer Type</i> (Primary, Secondary and Third)	This element provides an indication of the employer or self-employed setting in which the professional engages in practice, and permits monitoring of changes in the types of employers or self-employed settings over time. Collection of this element permits an examination of, among other things, the number of professionals employed in community settings outside of hospitals.			

Field/Data Element	Rationale			
Employment—Current (Specific) (cont'd) Primary Employment—the employment, with an employer or in a self-employed arrangement, that is associated with the highest number of usual weekly hours worked. Secondary Employment—the employment, with an employer or in a self-employed arrangement, associated with the second-highest number of usual weekly hours worked. Third Employment—the employment, with an employer or in a self-employed arrangement, associated with the third-highest number of usual weekly hours worked.				
50. 62. 74. <i>Area of Practice</i> (Primary, Secondary and Third)	Used to identify the major activities of a professional.			
51. 63. 75. <i>Usual Weekly Hours of Work</i> (for Primary, Secondary and Third Employment)	Collection of worked hours can be a measure of capacity (available supply of personnel) and can be used to estimate the number of full-time equivalents in relation to comparable head count data. The collection of this element is especially important in situations of casual or self-employed work arrangements, where the parameters of worked hours are not prescribed by an employer/employment contract.			
52. 64. 76. <i>Funding Source</i> (Primary, Secondary and Third)	This element allows the identification of the public and private sources of funding for the professional's employed activity.			
53. 65. 77. <i>Client Age Range</i> (Primary, Secondary and Third)	Used to identify the main population age group being served by professionals with the role of direct service provider.			
78. Registration Date	Used by CIHI to confirm that records submitted to CIHI fall within the data collection period assigned to each submitting jurisdiction by CIHI.			

3 Guidelines for Data Submission

3.1 The Data Providers

The data providers are the 10 provincial regulatory bodies (which supply licensing membership data for their respective province) and the Canadian Association of Occupational Therapists (which provides voluntary membership data for the territories).

The table below provides further details on the data providers for the OTDB.

Data Provider	Corresponding Province/Territory of Data Submission
Newfoundland and Labrador Occupational Therapy Board	Newfoundland and Labrador
Prince Edward Island Occupational Therapy Registration Board	Prince Edward Island
College of Occupational Therapists of Nova Scotia	Nova Scotia
New Brunswick Association of Occupational Therapists	New Brunswick
Ordre des ergothérapeutes du Québec	Quebec
College of Occupational Therapists of Ontario	Ontario
College of Occupational Therapists of Manitoba	Manitoba
Saskatchewan Society of Occupational Therapists	Saskatchewan
Alberta College of Occupational Therapists	Alberta
College of Occupational Therapists of British Columbia	British Columbia
Canadian Association of Occupational Therapists	Northwest Territories, Nunavut and Yukon

3.2 Annual Data Collection Date

In accordance with the agreement between the data providers and CIHI, data will be provided annually for the point-in-time data collection date of October 1. All jurisdictions have different registration periods. For the purposes of the OTDB, the data provided should include all registrations received between the start of the data provider's registration period and September 30 (inclusive) of the data submission year.

3.3 Deadline for Submission

In accordance with the agreement between the data providers and CIHI, registration data can be submitted to CIHI anytime between October 1 and October 31 of the respective data submission year.

The deadline for submission is October 31 of the data submission year.

3.4 Records for Submission

The target population for the OTDB is all occupational therapists who submit active registrationsⁱ to the data providers.

Details regarding which registration/membership categories should be included in the active category (and subsequently submitted to CIHI) are included in each jurisdiction-specific *Form Mapping Document*.

4 Data Acceptance Rules

- Data should be edited at the source.
- Only error-free data should be submitted. Error-free data is defined as information that
 - Conforms to the physical record and file layout as defined in this document; and
 - Contains only valid information or code values defined in the Occupational Therapist Record layout.
- A submission file can contain only registration data for the period agreed upon in the data agreement.
- Data will be submitted in a file of a fixed record length.
- A control record will be present at the start of the data file. The purpose of the control record is to describe the contents of the file. Partial transmissions—resulting in the record count not matching the total count on the control record—will be rejected in their entirety without further validation.
- A notification of acceptance or rejection of the data submissions will be transmitted back to the supplying data provider. Accepted data will be integrated into CIHI's data holdings; rejected records will not be integrated.

i. "Active" is based on the annual practice permit and deems that the registrant is eligible to practise as an occupational therapist.

- Data that does not pass CIHI's edits and validations will be rejected and the respective data provider will receive specific notification of the errors encountered.
- Data providers will be informed of errors detected in their submitted files via a detailed error report. The data provider must supply corrected records by resubmitting the entire data file (a file that contains both corrected records plus all of the original records that were without errors).

5 File Layout and File Submission

5.1 File Characteristics

Registration data is submitted in a fixed length file with a fixed record length of 242 characters. This file must consist of the following:

- 1. A control, or header, record—This record describes the contents of the file and must be the first record in the file. The control record must be 242 characters in length.
- Detailed records (individual record-level data)—These records must all be in the same format and be 242 characters in length. Each record describes the education and employment characteristics of a single occupational therapist. There may be only one record per occupational therapist.
- 3. The file to be created is a plain (ASCII) text file *without* delimiters (such as tabs or commas) and must have ".txt" as the file extension. Each record must start on a new line.

Detailed information on the record layout for the control record and individual records is provided in Section 6.

5.2 File-Naming Convention

File names are standardized to facilitate the receipt and processing of occupational therapist data. The file name indicates the database name (and, indirectly, the profession), submitting data provider, data collection period and file version. The file name layout is as follows:

Field	Value and/or Valid Format	Description	
Occupation Identification Code	000	Indicates the Occupational Therapist Database	
Current Data Year	YYYY (format)	The year of data submission	
Data Provider Identifier	AAAAA (format)	A five-character code assigned by CIHI to the data provider	
	See Appendix A for values		
File Version Number	99 (format)	Indicates which version of the file is being submitted	
		The first file to be submitted for a given calendar year should have a file version number of 01. In subsequent iterations of the file, the version number will increase by one each time (02, 03, etc.).	
File Name Extension	.txt	The file name extension must be ".txt"	

Example File Name

• OCC2011AB00101.txt

This example file name identifies this file as being an occupational therapist file for the calendar year 2011 and from the data provider AB001. It is the first iteration of the file to be received from the data provider.

5.3 Data Submission and Transmission

To protect the safety of confidential information and satisfy national and provincial privacy legislation, CIHI requests that all data files be submitted via CIHI's electronic Data Submission Services (eDSS).

CIHI offers eDSS as a means of transmitting electronic files to CIHI via the internet. eDSS provides security that meets corporate and industry standards through the use of

- Secure encrypted protocols during file upload and transfer from the client's machine to CIHI's servers; and
- Restriction of system access to only those users who have been authorized and authenticated.

Data providers interested in taking advantage of this service are advised to contact CIHI's Central Client Services by email at help@cihi.ca.

Although eDSS is CIHI's preferred method of receiving data, data providers who do not have sufficient infrastructure may be allowed to submit data on a CD or DVD that is sent by registered mail or bonded courier service. For further information, please send an email to the Program Lead, Occupational Therapist Database, at otdb@cihi.ca.

6 Record Layout

6.1 Updates From Version 2.0 to Version 3.0

Changes were made to the *Occupational Therapist Data Submission Specifications Manual Version 2.0.* The following data values were added/removed:

Change in Codes for Data Values, Version 3.0	Definition	Data Element/ Code List Affected				
Level of Basic Education in Occupational Therapy						
REMOVED 40: Doctorate	This code/value has been removed from Level of Basic Education in Occupational Therapy only. It has been replaced with <i>doctorate (entry to profession)</i> .	15: Level of Basic Education in Occupational Therapy				
	Note: Although this code/value has been removed, it may be used by some data providers who are in the process of transitioning to the new codes/values.					
ADDED 41: Doctorate (entry to profession)	A post-graduate-level university degree that prepares the graduate for entry to the profession of occupational therapy.	15: Level of Basic Education in Occupational Therapy				
NEW value name 31: Master's (entry to profession)	A graduate-level university degree that prepares the graduate for entry to the profession of occupational therapy.	15: Level of Basic Education in Occupational Therapy				
REMOVED 32: Research master's	(See Level of Post-Basic Education in Occupational Therapy 1, 2, 3)	15: Level of Basic Education in Occupational Therapy				
	Note: Although this code/value has been removed, it may be used by some data providers who are in the process of transitioning to the new codes/values.					
Level of Post-Basic Educ	ation in Occupational Therapy 1, 2, 3					
REMOVED 31: Master's (entry to profession)	A graduate-level university degree that prepares the graduate for entry to the profession of occupational therapy.	19, 23, 27: Level of Post-Basic Education in Occupational Therapy 1, 2, 3				
NEW value name 32: Post-entry master's	The value <i>research master</i> 's has been renamed <i>post-entry master</i> 's.	19, 23, 27: Level of Post-Basic Education in Occupational Therapy 1, 2, 3				
ADDED 41: Doctorate (entry to profession)	A post-graduate-level university degree that prepares the graduate for entry to the profession of occupational therapy.	19, 23, 27: Level of Post- Basic Education in Occupational Therapy 1, 2, 3				
Canadian University of Graduation for Basic Education in Occupational Therapy and Post-Basic Education in Occupational Therapy 1, 2, 3						
ADDED 24006000: Université de Sherbrooke 24011000: Université du Québec à Trois-Rivières	New schools are now offering programs of occupational therapy.	17, 21, 25, 29: Canadian University of Graduation for Basic Education in Occupational Therapy and Post-Basic Education in Occupational Therapy 1, 2, 3				

For changes incorporated into version 2 from version 1, please see the Occupational Therapist Database Data Submission Specifications Manual Version 2.0, found here.

6.2 Control Record Format

A control record is required at the start of each file. The control record describes the contents of the file. The type of information to be provided in the control record and the format of that information is outlined in the table below.

Field Number	Data Element	Start Byte	Length	Туре	Values and/or Format
1	Occupation Abbreviation	1	5	Character	осстн
2	Data Provider Identifier	6	5	Character	AAAAA (format) See Appendix A for values
3	Current Data Year	11	4	Character	YYYY (format)
4	Number of Records	15	6	Numeric	The total number of records in the file (not including the control record)
5	File Creation Date	21	8	Date	YYYYMMDD The date the file was created
6	Provincial/Territorial Unique Identification/ Registration Number Type	29	1	Character	R (Registration Number) or S (Substitute Number)
7	Filler	30	213	Character	Xs are added to the end of the record so that the control record is the same length as the detailed records

Notes

Field 6: Provincial/Territorial Unique Identification/Registration Number Type

Unique provincial/territorial identification/registration numbers for occupational therapists may be included in one of two ways:

1. The actual **registration** number may be used, or

2. A substitute (dummy) number may be used.

The type of number to be supplied is left to the discretion of the jurisdiction; however, regardless of which type of number is provided, the number for each respective registrant needs to be the same every year. If dummy numbers are supplied, they must remain consistent every year for each individual registrant (this enables CIHI to conduct longitudinal analysis on the data). **Field 7: Filler**

Filler of 213 Xs will be accepted, per previous specifications.

Sample Control Record

Occupation		Current Data Year	Number of	File Creation Date	Provincial/Territorial Unique Identification/Registration Number Type (R [Registration] or S [Substitute])	Filler
OCCTH	AB001	2011	000750	20111031	R	Xs

In this sample control record,

- OCCTH indicates that the professionals are occupational therapists;
- AB001 indicates that the file was submitted by data provider AB001;
- 2011 indicates that the data collection year is 2011;
- 000750 indicates that there are 750 records in the file (not including the control record);
- 20111031 indicates that the file was created on October 31, 2011;
- R indicates that the registration numbers are actual registration numbers; and
- Xs indicate that the record is padded with filler characters.

6.3 Occupational Therapist Data Element Definitions and Record Layout

The following table provides the detailed information required to create records in a sequential file suitable for processing by CIHI.

Note: In field 1 (Provincial/Territorial Unique Identification/Registration Number), the length of the number may vary between data providers. If the length of the number being submitted is shorter than the maximum allowed (16 characters), the unique identification number must be left-justified and the remainder of the field filled with spaces (blanks).

Field Number	Data Element—Definition	Start Byte	Length	Values and/ or Format	Definition
1	Provincial/Territorial Unique Identification/ Registration Number	1	16	alternative	A lifetime registration number, or suitable alternative, that uniquely identifies an occupational therapist within a particular jurisdiction. This number is a lifetime unique identifier assigned by the submitting jurisdiction for administrative purposes.

Field Number	Data Element—Definition	Start Byte	Length	Values and/ or Format	Definition
2	Gender	17	1	F: Female	
	The reported sexual category of a registrant, at the time of			M: Male	
	for administrative purposes.			7: Not Collected	Data element is not collected and/or not submitted by the data provider.
				9: Unknown	Data collector or data submitter is unable to obtain the required information for a specific data element.
3	Year of Birth	18	4	Format: YYYY	Valid year
	Year of birth of the registrant.			9997: Not Collected	Data element is not collected and/or not submitted by the data provider.
				9999: Unknown	Data collector or data submitter is unable to obtain the required information for a specific data element.
4	Province/Territory	22	2	See Appendix B	Canadian province/territory codes

Field Number	Data Element—Definition	Start Byte	Length	Values and/ or Format	Definition	
48	Primary Position At the time of registration or renewal, the main role within the primary employment (for registrants with multiple roles within primary employment,	163	2	10: Manager	Major role is in management. Role may involve the management of a particular program, as in a first- level management position, up to the senior-most management positions.	
	reflects the role associated with the most worked hours).				20: Professional Leader/ Coordinator	Direct service provider with a leadership role in the professional practice within an employment setting.
				30: Direct Service Provider	Major role is in the direct delivery of occupational therapy services, including case management and/or consultation.	
				40: Educator	Major role is as an educator for a particular target group.	
				50: Researcher	Major role is in knowledge development and dissemination of research.	
				60: Other	Position that is not otherwise identified.	
				97: Not Collected	Data element is not collected and/or not submitted by the data provider.	
				98: Not Applicable	Data element is collected but does not apply.	
				99: Unknown	Data collector or data submitter is unable to obtain the required information for a specific data element.	
49	Primary Employer Type At the time of registration or renewal, for primary employment, the type of employer (whether an employee or self-employed). This is the site where service is delivered.	165	3	010: General Hospital	Health care facility that offers a range of inpatient and outpatient health care services (for example, medical, surgical, psychiatry) available to the target population. Includes specialty hospitals not otherwise classified.	
	The site where service is delivered refers to the location where the registrant is directly engaged in their occupational therapy area of practice: direct			020: Rehabilitation Hospital/Facility	Health care facility that has as its primary focus the post-acute, inpatient and outpatient rehabilitation of individuals.	
	service; client management; administration; education; or research.			030: Mental Health Hospital/Facility	Health care facility that has as its primary focus the acute or post- acute, inpatient and/or outpatient care of individuals with mental health issues and illness.	
				040: Residential Care Facility	Refers to a licensed or regulated health facility that provides 24- hour skilled or immediate nursing care (that is, qualified nurses are on-site and available to respond immediately, if required). Includes long-term care facilities, nursing homes, special-care homes and homes for the aged.	

Field Number Data Element—Definition	Start Byte	Length	Values and/ or Format	Definition
			050: Assisted- Living Residence	Refers to a non-institutional community setting that integrates a shared living environment with varying degrees of supportive services of the following types: supervision, housekeeping, personal care, meal service, transportation, social and recreational opportunities, etc. May have limited medical/nursing services available. Includes group homes, retirement homes, community care homes, lodges, supportive housing and congregate living settings.
			060: Community Health Centre	A community-based organization that may be the first point of contact for clients offering a range of primary health, social and/or other non-institutional based services, including occupational therapy.
			070: Visiting Agency/Business	A community-based agency or group professional practice/business focused on delivering health services, including occupational therapy, in the client's environment such as the home or workplace.
			080: Group Professional Practice/Clinic	A community-based group professional practice/business or clinic organized around the delivery of primarily on-site health services, including occupational therapy, by a group of health professionals. Clients typically come to the professionals' location to receive services. Other support staff may also be involved; however, the health professionals are the focus of service provision.
			090: Solo Professional Practice/Business	A community-based professional practice/business organized around the delivery of occupational therapy health services, by a single professional. Support staff may also be involved; however, the health professional is the focus of service provision.
			100: Post- Secondary Educational Institution	A post-secondary institution, either a university, college or equivalent institution, with a primary focus on the delivery of education.

Field Number	Data Element—Definition	Start Byte	Length	Values and/ or Format	Definition
				110: School or School Board	A primary, elementary or secondary school (or equivalent institution), or the associated school board (or equivalent entity) that has responsibility for the governance and management of education funding issued by provincial governments.
				120: Association/ Government/ Para- Governmental	An organization or government that deals with regulation, advocacy, policy development, program development, research and/or the protection of the public, at a national, provincial/territorial, regional or municipal level.
				130: Industry, Manufacturing and Commercial	A business/industry whose focus of activities is not in the direct delivery of health care services but rather the health of workers, health-related product development or commercial activity outside of the health care system entirely.
				140: Other	Place of employment not otherwise identified.
				997: Not Collected	Data element is not collected and/or not submitted by the data provider.
				998: Not Applicable	Data element is collected but does not apply.
				999: Unknown	Data collector or data submitter is unable to obtain the required information for a specific data element.
50	Primary Area of Practice At the time of registration or	168	3	Note: Bold underlinot values.	ined text refers to groupings and

78	Registration Date Date assigned by the primary data collector indicating that the data provided falls within the parameters of the data collection period CIHI assigns to each submitting jurisdiction.	237	6	Format: YYYYMM	Year (four-digit) and month (two-digit)

7 File and Record Processing

Once data files are received by CIHI, all records undergo specific processing before being included in the OTDB. That processing occurs in the following sequence:

7.1 File Integrity Validation Processing

- File integrity validation processing checks the physical characteristics of the data file. The contents of the file's control record are checked for errors, and the detailed records are counted. The count ensures that the number of detailed records is the same as in the control record count. Each detailed record is also checked to ensure that its record length matches the specifications.
- If the file does not pass file integrity validation processing, the entire file will be rejected and a report outlining the errors will be produced.

7.2 Record Validation Processing

- Record validation processing validates the data elements included in each record for format, content and internal consistency.
- This includes the validation of code fields (for example, the only possible choices for code values for male and female are M—*male*, F—*female*, 7—*not collected* and 9—*unknown*).
- The data also undergoes tests of the logical relationships between specific fields. For example, an error is identified if the value for Year of Graduation is less than the value for Year of Birth.
- Should the submitted codes not match the standardized CIHI codes, or if a logical relationship between fields is incorrect, a report will be generated that will identify the error and the record will not be included in the OTDB.

7.3 Error Correction

Reports that identify errors will be shared with the respective data providers. Errors are
reviewed jointly by CIHI and the respective data providers and corrected by the data provider.
This is an iterative process and requires ongoing consultation between CIHI and the data
provider in the weeks after file submission. The data providers are expected to correct the
source data and to resubmit the entire file—that is, the original clean records plus the
corrected records.

Appendix A—Data Provider Identifier Codes

Value	Data Provider	Corresponding Province/ Territory of Data Submission
NL001	Newfoundland and Labrador Occupational Therapy Board	Newfoundland and Labrador

Statistics Canada. The above list has been derived from the Post-Secondary Institution Code Set used by Statistics Canada as part of the Enhanced Student Information System (ESIS). ESIS is the national survey that enables Statistics Canada to publish information on <u>enrolments at and graduates</u> of Canadian post-secondary education institutions. Further information can be obtained from the following website: http://www.statcan.gc.ca/concepts/psis-siep/postsecond-eng.htm.
